This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims

30. (Currently Amended) A method for executing tasks print jobs with devices printers, comprising:

displaying a first tree view of a hierarchy of a first set of user selectable elements representing devices printers in a first pane of a graphical user interface (GUI) window;

displaying a second tree view of a hierarchy of a second set of user selectable elements representing tasks print jobs capable of being executed by the devices printers in a second pane of the GUI window; and

receiving indication of user selection of one of the tasks print jobs displayed in the second pane and one of the devices printers displayed in the first pane to cause the selected device printer to execute the selected task print job.

31. (Previously Presented) The method of claim 30, further comprising:

receiving indication of user selection of one of the selectable elements displayed in the first pane or the second pane; and

displaying additional data related to the user selected element in a third pane in the GUI window, wherein the third pane is capable of displaying additional data related to selectable elements the user selected in the first and second panes.

32. (Currently Amended) The method of claim 31, wherein the additional data displayed in the third pane in response to selection of one selectable element in the first pane representing one device printer indicates an operation status of at least one device printer.

33. (Currently Amended) The method of claim 31, wherein the additional data displayed in the third pane in response to user selection of one selectable element in the second pane representing one task print job indicates information on the task print job.

34. (Currently Amended) The method of claim 33, further comprising:
after one task print job for which information is displayed has completed executing,
displaying the second pane without the selectable element representing the task print job that has
completed.

35. (Currently Amended) The method of claim 30, further comprising:
receiving indication of user selection of one selectable element in the first pane associated
with all the user selectable elements representing the devices printers; and
displaying additional data in a third pane indicating an operational status of all the
devices printers represented by user selectable elements displayed in the first pane.

36. (Canceled)

37. (Currently Amended) The method of ~~claim 36~~ claim 30, further comprising:
displaying in a third pane status of print jobs represented by user selectable elements in
the second pane.

38. (Currently Amended) The method of ~~claim 36~~ claim 30, further comprising:
displaying in the third pane media available at each printer represented by the user
selectable elements in the first pane.

39. (Currently Amended) The method of claim 30, wherein receiving indication of
user selection of one of the tasks print jobs and one of the devices printers comprises:
receiving user indication of dragging one task print job represented in the second pane
and dropping the dragged task print job to one device printer represented in the first pane.

40. (Currently Amended) A system for executing tasks print jobs with devices printers, comprising:
means for displaying a first tree view of a hierarchy of a first set of user selectable
elements representing devices printers in a first pane of a graphical user interface (GUI) window;

means for displaying a second tree view of a hierarchy of a second set of user selectable elements representing ~~tasks~~ print jobs capable of being executed by the ~~devices~~ printers in a second pane of the GUI window; and

means for receiving indication of user selection of one of the ~~tasks~~ print jobs displayed in the second pane and one of the ~~devices~~ printers displayed in the first pane to cause the selected ~~device~~ printer to execute the selected ~~task~~ print job.

41. (Previously Presented) The system of claim 40, further comprising:

means for receiving indication of user selection of one of the selectable elements displayed in the first pane or the second pane; and

means for displaying additional data related to the user selected element in a third pane in the GUI window, wherein the third pane is capable of displaying additional data related to selectable elements the user selected in the first and second panes.

42. (Currently Amended) The system of claim 41, wherein the additional data displayed in the third pane in response to selection of one selectable element in the first pane representing one ~~device~~ printer indicates an operation status of at least one ~~device~~ printer.

43. (Currently Amended) The system of claim 41, wherein the additional data displayed in the third pane in response to user selection of one selectable element in the second pane representing one ~~task~~ print job indicates information on the ~~task~~ print job.

44. (Currently Amended) The system of claim 43, further comprising:

means for displaying the second pane without the selectable element representing the ~~task~~ print job that has completed after one ~~task~~ print job for which information is displayed has completed executing.

45. (Currently Amended) The system of claim 40, further comprising:

means for receiving indication of user selection of one selectable element in the first pane associated with all the user selectable elements representing the ~~devices~~ printers; and

Firm No. 0036.0092

means for displaying additional data in a third pane indicating an operational status of all the ~~devices~~ printers represented by user selectable elements displayed in the first pane.

46. (Canceled)

47. (Currently Amended) The system of ~~claim 46~~ claim 40, further comprising:
displaying in a third pane status of print jobs represented by user selectable elements in the second pane.

48. (Currently Amended) The system of ~~claim 46~~ claim 40, further comprising:
displaying in the third pane media available at each printer represented by the user selectable elements in the first pane.

49. (Currently Amended) The system of claim 40, wherein receiving indication of user selection of one of the ~~tasks~~ print jobs and one of the ~~devices~~ printers comprises:
receiving user indication of dragging one ~~task~~ print job represented in the second pane and dropping the dragged ~~task~~ print job to one ~~device~~ printer represented in the first pane.

50. (Currently Amended) A computer program having code embedded on a computer readable medium for executing ~~tasks~~ print jobs with ~~devices~~ printers using a graphical user interface (GUI) window displayed on a computer display monitor, comprising:

displaying a first tree view of a hierarchy of a first set of user selectable elements representing ~~devices~~ printers in a first pane of a graphical user interface (GUI) window;

displaying a second tree view of a hierarchy of a second set of user selectable elements representing ~~tasks~~ print jobs capable of being executed by the ~~devices~~ printers in a second pane of the GUI window; and

receiving indication of user selection of one of the ~~tasks~~ print jobs displayed in the second pane and one of the ~~devices~~ printers displayed in the first pane to cause the selected device printer to execute the selected ~~task~~ print job.

51. (Currently Amended) The computer program of claim 50, further comprising:
receiving indication of user selection of one of the selectable elements displayed in the first pane or the second pane; and
displaying additional data related to the user selected element in a third pane in the GUI window, wherein the third pane is capable of displaying additional data related to selectable elements the user selected in the first and second panes.

52. (Currently Amended) The computer program of claim 51, wherein the additional data displayed in the third pane in response to selection of one selectable element in the first pane representing one device printer indicates an operation status of at least one device printer.

53. (Currently Amended) The computer program of claim 51, wherein the additional data displayed in the third pane in response to user selection of one selectable element in the second pane representing one task print job indicates information on the task print job.

54. (Currently Amended) The computer program of claim 53, further comprising:
after one task print job for which information is displayed has completed executing,
displaying the second pane without the selectable element representing the task print job that has completed.

55. (Currently Amended) The computer program of claim 50, further comprising:
receiving indication of user selection of one selectable element in the first pane associated with all the user selectable elements representing the devices printers; and
displaying additional data in a third pane indicating an operational status of all the devices printers represented by user selectable elements displayed in the first pane.

56. (Canceled)

57. (Currently Amended) The computer program of ~~claim 56~~ claim 50, further comprising:

displaying in a third pane status of print jobs represented by user selectable elements in the second pane.

58. (Currently Amended) The computer program of ~~claim 56~~ claim 50, further comprising:

displaying in the third pane media available at each printer represented by the user selectable elements in the first pane.

59. (Currently Amended) The computer program of claim 50, wherein receiving indication of user selection of one of the tasks print jobs and one of the devices printers comprises:

receiving user indication of dragging one task print job represented in the second pane and dropping the dragged task print job to one device printer represented in the first pane.
